

TRANSINSIGHT®

FOR IMMEDIATE RELEASE

TRANSINSIGHT 10 YEARS OF SEMANTIC EXCELLENCE: CONGRATULATIONS!

Dresden, Germany, 19 of November 2015. Using artificial intelligence for answering biomedical questions. Ten years of business in the semantic field in biomedicine.

Ten years ago, on November 19th 2005, we had a vision: to bring artificial intelligence to the biomedical domain. To contribute to better health for billions would make a big difference for the world, was our motivation. We started as true entrepreneurs and dove into the field of semantics and ontologies. Words, that were ten years ago, known and understood by few people. We created www.GoPubMed.org, the first and still only semantic search engine in the world and helped millions of researchers in both industry and science to do their work more efficiently. The feedback from customers and researchers from universities like Stanford, Harvard, LMU Munich and Leopoldina as well as famous companies like Bayer, BASF, Adipogen and Unilever was our motivation to try harder every day providing an excellent service online and to create a software suite for in-house use, our Enterprise Semantic Intelligence® Knowledge Suite, today used by hundreds of customers.

"Where will we be in ten years from now? I think the next leap is greater than the last one. Science and technology growth is exponential, last but not least also through our small contribution in intelligent semantic software development. I expect systems that can answer more complex questions in biomedicine through the integration of text and data mining. Today our systems mostly rely on text analysis since structured data is only partly available. But the trend is set: data are the base for the written publication and give valuable insight and allow to draw conclusions in much better ways. An exciting road to go!" so Dr. Michael R. Alvers, CEO of Transinsight.

Congratulations to our team! Thanks for excellent work over the past ten years. Thanks to all our valued customers for believing in a small startup in the early years of semantics. You made it possible! Let's move on.

ABOUT TRANSINSIGHT

Transinsight develops knowledge-based solutions. Their semantic software platform Enterprise Semantic Intelligence® powers the knowledge-based search systems www.Go3R.org and www.GoPubMed.com, semantic search engines for the next generation. In acknowledgement of the technologies developed by the company, Transinsight has repeatedly been honored with international awards amongst others the red*dot* design award - communication design - best of the best 2009, the German Industry Prize 2010, the German Innovation Prize IT 2011 and the Detecon ICT Award 2012. The firm works in close collaboration with the Dresden University of Technology. Selected customers are: Unilever, BASF, Adipogen, Abcam und Bayer. Internet: www.transinsight.com.
